# The Future of Canadian Lithium

April 2024

TSX.V: ETL | OTCQX: EEMMF | FSE: OW3

# Forward Looking Statements

This presentation contains forward-looking statements regarding E3 Lithium Ltd. (“E3 Lithium” or “the Company”) and the potential of its current and future projects. Generally, forward-looking statements can be identified by the use of forward-looking language such as “plans”, “expects”, “budgets”, “schedules”, “estimates”, “forecasts”, “intends”, “anticipates”, “believes”, or variations of such words and phrases, and statements that certain actions, events or results “may”, “could”, “would”, “might”, “will be taken”, “will occur” or “will be achieved”. Forward-looking statements are based on the opinions and estimates of E3 Lithium as of the date such statements are made.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, levels of activity, performance or achievements of E3 Lithium to be materially different from those expressed or implied by such forward-looking statements, including, but not limited to, risks related to: E3 Lithium’s ability to effectively implement its planned exploration programs; unexpected events and delays in the course of E3 Lithium’s exploration and drilling programs; changes in project parameters as plans continue to be refined; the ability of E3 Lithium to raise the capital necessary to meet its milestones, conduct its planned exploration programs and to continue exploration and development on its properties; the failure to discover any significant amounts of lithium or other minerals on any of E3 Lithium’s properties; the fact that E3 Lithium’s properties are in the exploration stage and exploration and development of mineral properties involves a high degree of risk and few properties which are explored are ultimately developed into producing mineral properties; the fact that the mineral industry is highly competitive and E3 Lithium will be competing against competitors that may be larger and better capitalized, have access to more efficient technology, and have access to reserves of minerals that are cheaper to extract and process; the fluctuations in the price of minerals and the future prices of minerals; the fact that if the price of minerals decreases significantly, any minerals discovered on any of E3 Lithium’s properties may become uneconomical to extract; the continued demand for minerals and lithium; that fact that resource figures for minerals are estimates only and no assurances can be given that any estimated levels of minerals will actually be produced; governmental regulation of mining activities and oil and gas in Alberta and elsewhere, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection; environmental regulation, which mandate, among other things, the maintenance

of air and water quality standards and land reclamation, limitations on the general, transportation, storage and disposal of solid and hazardous waste; environmental hazards which may exist on the properties which are unknown to E3 Lithium at present and which have been caused by previous or existing owners or operators of the properties; reclamation costs which are uncertain; the fact that commercial quantities of minerals may not be discovered on current properties or other future properties and even if commercial quantities of minerals are discovered, that such properties can be brought to a stage where such mineral resources can profitably be produced therefrom; the failure of plant or equipment processes to operate as anticipated; the inability to obtain the necessary approvals for the further exploration and development of all or any of E3 Lithium’s properties; risks inherent in the mineral exploration and development business; the uncertainty of the requirements demanded by environmental agencies; E3 Lithium’s ability to hire and retain qualified employees and consultants necessary for the exploration and development of any of E3 Lithium’s properties and for the operation of E3 Lithium’s business; and other risks related to mining activities that are beyond E3 Lithium’s control.

Although E3 Lithium has attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking statements in this presentation, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements contained in this presentation. E3 Lithium does not undertake to update any forward-looking statements except in accordance with applicable securities laws.

Unless otherwise indicated, Chris Doornbos, P. Geo., President and CEO at E3 Lithium Ltd. and a Qualified Person under National Instrument 43-101, has reviewed and is responsible for the technical information contained in this presentation.

OUR VISION

**To be a global leader  
in responsibly-sourced lithium,  
fueling the global transition towards  
a brighter energy future.**

---

# About E3 Lithium

## Canada's largest high confidence lithium resource

E3 Lithium has 16.0 Mt of Measured & Indicated lithium in brine resources, 5x more than Canada's next largest M&I resource<sup>1</sup> and significant on a global scale.

## De-risked, high ESG extraction technology

E3 Lithium has proven Direct Lithium Extraction technology on its brines at scale through its 2023 field pilot plant, de-risking its commercialization plans.

## Clear and ambitious pathway to commercialization

With a track record of success and proven ability to fund, staff, plan and execute on its plans, E3 Lithium is building western North America's critical minerals supply chain.

# Advancing the Clearwater Project

## Clearwater Project (Bashaw District)

### World-class assets:

E3 Lithium is poised to produce sustainable battery-grade lithium from brine found in one of the largest resources globally in the world-class Leduc Aquifer. Based in Alberta, E3 Lithium's Clearwater Project is being developed on the backbone of the mature and sophisticated energy industry that will allow the company to catapult its development.

### Canada's largest lithium M&I:

16.0 million tonnes of Measured & Indicated Lithium Carbonate Equivalent

## HIGHLIGHTS

Primary  
 Commodity:  
 Lithium

Phase 1 Plan:  
 Estimated 20,000+ tonnes LHM/year  
 with potential to expand up to  
 150,000 tonnes LHM/year

Field Pilot Plant  
 Completed

Pre-feasibility  
 Study (PFS)  
 underway

Resource  
 16.0 Mt LCE M&I  
 + 0.9 Mt Inferred

# A Growing and Robust Market

- **Strong demand growth** expected from Electric Vehicle (EV) sales and battery capacity growth from 2026 into 2035
- **Beyond passenger EVs, lithium demand is growing** for e-buses, commercial EVs, stationary storage and consumer electronics<sup>1</sup>
- **Anticipated supply constraints** likely to coincide with E3's planned production

# NORTH AMERICAN BATTERY INITIATIVES

Analysis by CIC **energiGUNE**

TSX.V: ETL  
OTCQX: EEMMF  
FSE: OW3

Version 5. Last update: 09/2023

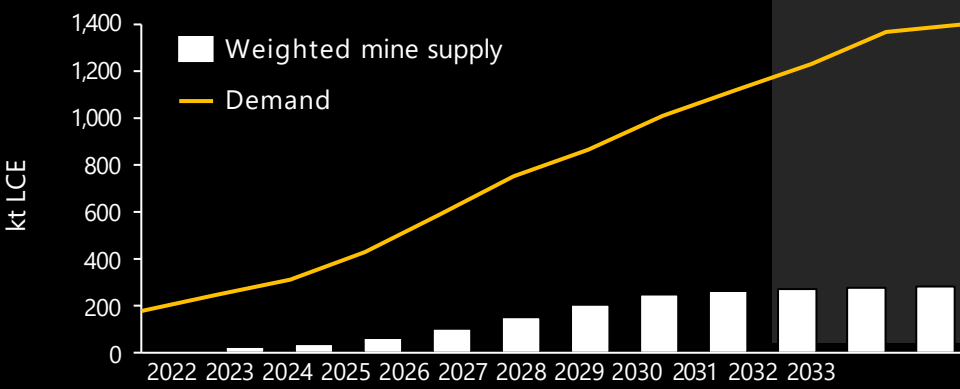

# The Next Generation of Lithium Production

# North America

2023

- 3 Operating Lithium Mines
- 3 Lithium Chemical Producers

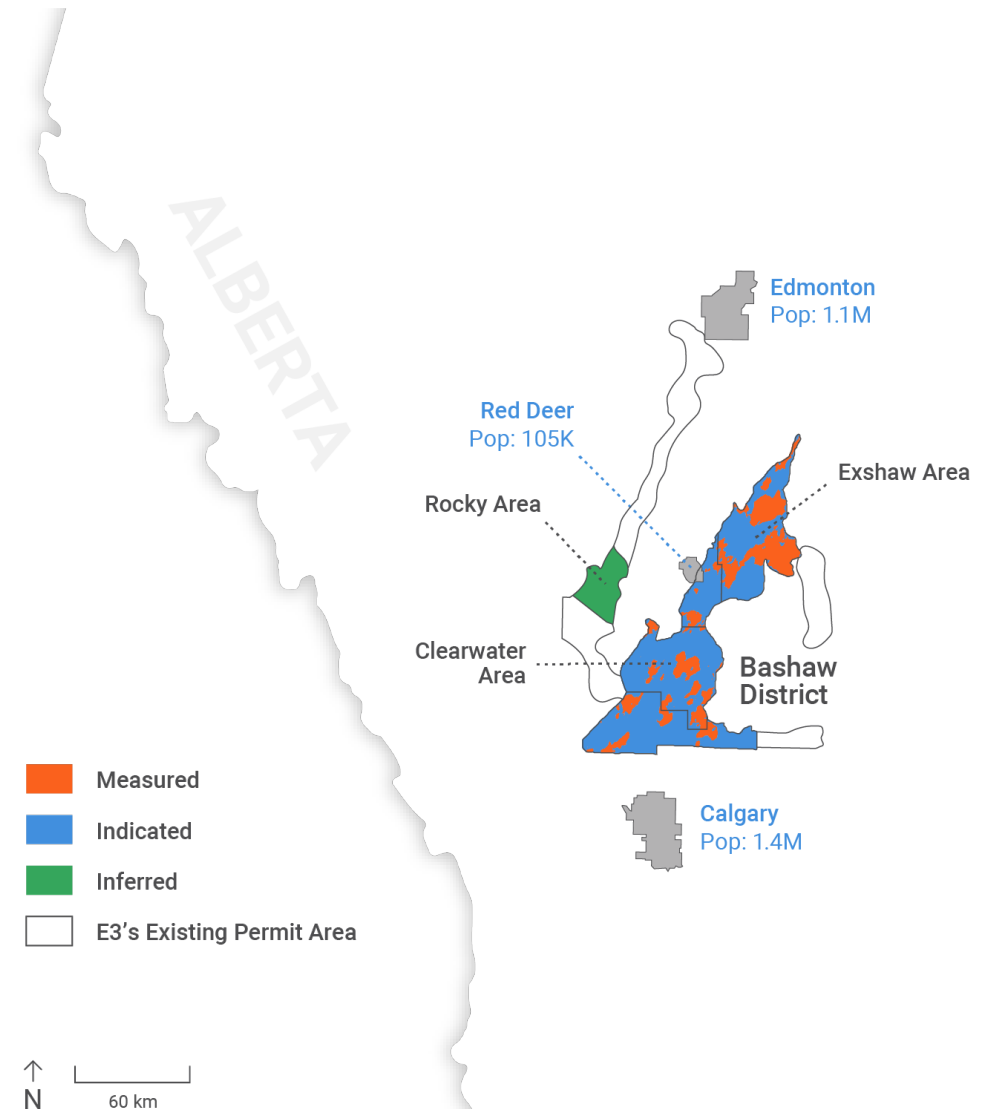

2033

- 34 Operating Lithium Mines
- 35 Lithium Chemical Producers

- Possible
- Probable
- Highly Probable
- Operating

# Global Scale Measured & Indicated DLE Resources

COMPANY	LOCATION	M&I (MT LCE)
Lithium Americas	U.S.	16.1
E3 Lithium	Canada	16.0
Jindalee Resources	U.S.	11.1
Vulcan Resources	Europe	10.1
Galan Lithium	Argentina	6.4
Standard Lithium	U.S.	4.2
Lake Resources	Argentina	2.9
Alpha Lithium	Argentina	2.1
Lithium Power International	Argentina	1.9
Lithium Chile	Chile, Argentina	1.7
Lithium South Development	Argentina	1.6
CleanTech Lithium	Chile	1.1
LithiumBank/Pristine	Canada	0.4
Anson Resources	Utah	0.3
Arizona Lithium	Canada & U.S.	0.2

# DLE Field Pilot Plant Exceeds KPIs

Direct Lithium Extraction (DLE) technology is the key to unlocking E3 Lithium’s vast resource.

## 2023 Field Pilot Plant Results

The test results produced at E3’s 2023 DLE Field Pilot Plant exceeded all KPIs. Results produced via one test run include<sup>1</sup>:

- 94% lithium recovery
- 80.1% and 909.0 mg/L lithium grade in the lithium product stream
- Flow rate ratio of 9

The production of high-quality concentrate at relatively high flow rates enables E3 to proceed with developing lithium in Alberta.

E3 Lithium’s field pilot plant in central Alberta was constructed and operated in 2023.

1: All KPIs, fulsome results and descriptions can be found on [www.e3lithium.ca/Lithium1](http://www.e3lithium.ca/Lithium1)

E3 Lithium continues to develop the engineering and cost estimates required to demonstrate the commerciality of the process.

# A Track Record of Success

1: The mineral resource NI 43-101 Technical Report for the North Rocky Property, effective October 27, 2017, identified 0.9Mt LCE (inferred). The mineral resource NI 43-101 Technical Report for the Bashaw District Project, effective March 21, 2023, identified 16.0Mt LCE (measured & indicated). All reports are available on the E3 Lithium's website ([e3lithium.ca/technical-reports](http://e3lithium.ca/technical-reports)) and SEDAR ([www.sedar.com](http://www.sedar.com)).

# Road to Commercialization

2024

- Publish PFS results
- Feasibility Study (FS)
- Commercial development
- Environmental surveys
- Consultation and permitting

2025

- Detailed engineering
- Project finance
- Equipment procurement and manufacturing

2026

- Commercial construction and production (~20,000+ tonnes LHM per year)

2030s and beyond

- Potential to produce up to 150,000 tonnes of LHM/year, enough for approximately 2.2M EVs<sup>1</sup>, once entirety of Alberta resource is commercialized

# More than \$32M in Non-dilutive Funding Secured

Equity is comprised of capital raised and warrant and option exercises

# Established and Efficient Permitting Process

## The Alberta Advantage

### Efficient & established permitting process

Established permitting and licensing framework; lithium development under the Alberta Energy Regulator, providing streamlined licensing and approvals

### Existing infrastructure & skillset

Mature industry practices, skilled workforce and ability to re-purpose and use existing oil and gas infrastructure

### Strong foundation for resource development

Well developed Alberta frameworks that guide meaningful consultation with project stakeholders and Indigenous communities

# DLE Provides the Potential for Industry Leading ESG

The goal is to produce lithium to meet the highest ESG standards

E3's production facility and technology:

- Uses <3% of the land of typical lithium projects
- Requires no salars, tailings ponds or open pit mining
- Can reduce carbon footprint using renewable sources of power and carbon capture and sequestration

## HARD ROCK MINING

- Energy and capital intensive
- Large environmental footprint

## SALARS (Brines – Evaporative)

- Conventional evaporation process for brine concentration
- Slow process with large environmental footprint

## Direct Lithium Extraction (DLE)

- No freshwater aquifer interaction
- Closed loop system
- Minimal land footprint
- High flow rates
- Fixed reclamation and abandonment costs
- Low operation costs

**Canada's Largest M&I Resource**

Globally significant resource includes 16.0 Mt of M&I and 0.9 Mt of Inferred LCE<sup>1</sup>

**Direct Lithium Extraction technology successfully tested**

at near commercial scale in real-world operating conditions on E3's brines

**Proposed Phase 1 Plan: 20,000+ tonnes LHM/year**

Potential to expand to up to 150,000 tonnes LHM/year with a potential operating life up to 50 years

**Global growth in Electric Vehicle (EV) usage**

Long-term robust market demand for lithium

PEA demonstrates **USD 1.1B NPV<sub>8%</sub>** with 32% IRR (Pre-Tax)

**Industry-leading ESG characteristics**

Fundamental focus on minimal land footprint and carbon emissions

Our Partners:

1: The mineral resource NI 43-101 Technical Report for the North Rocky Property, effective October 27, 2017, identified 0.9Mt LCE (inferred). The mineral resource NI 43-101 Technical Report for the Bashaw District Project, effective March 21, 2023, identified 16.0Mt LCE (measured & indicated). All reports are available on the E3 Lithium's website ([e3lithium.ca/technical-reports](http://e3lithium.ca/technical-reports)) and SEDAR ([www.sedar.com](http://www.sedar.com)).

**Robin Boschman, MBA**  
Director, Investor Relations &  
Corporate Communications

# Board of Directors

---

A history of strong governance

## **John Pantazopolous, CFA, ICD.D**

Chairman of the Board

John is a finance and capital markets professional with more than 20 years of energy industry and senior banking experience.

## **Alexandra Cattelan, MASC**

Chair – Compensation and HR Committee

Alex has more than 30 years of experience leading electric propulsion and advanced mobility programs and lithium battery development.

## **Kevin Stashin, MBA, P.Eng**

Chair – Corporate Governance Committee

Kevin is an oil and gas executive with more than 40 years of industry experience with both junior and major companies.

---

## **Chris Doornbos, P.Geo, ICD.D**

Director, President, CEO

Chris is an expert in developing major projects both in Canada and across the globe and founded E3 Lithium in 2016.

## **Mike O’Hara, B.SC, P.Eng**

Chair – Audit Committee

Mike is an oil and gas executive with 35 years of experience in founding, developing and managing profitable, growth-oriented oil and gas companies.

## **Hon. Sonya Savage, KC, ECA, LLM**

Independent Director

Sonya started her career practicing law before transitioning to the pipeline industry. Sonya served for four years as a Senior Minister in the Alberta Government including as Minister of Energy.

# Advisory Committee

---

Designed to propel growth

## Justin Jimmy, ICD.D

Justin is an aviator and a Chief Financial Officer with Indigenous Government, as well as an entrepreneur in the retail and consulting industries.

## Suzanne Patrick

A retired Navy Commander and former Deputy Undersecretary of Defense, Suzanne served in the United States Navy Reserve for 21 years, rising to the rank of Commander.

## Hon. Brad Wall

Brad previously served as the Premier of Saskatchewan where he demonstrated a consistent ability to bring political and business leaders together, implementing creative ways to bolster the Province's economic well-being.

Supplementing our strong Board of Directors, our Advisory Committee's extensive experience and specialized expertise will help realize our vision to be a global leader in responsibly sourced lithium."

**Chris Doornbos**, President, CEO and Director E3 Lithium

# E3 Lithium's Alberta-based M&I Resources

E3'S RESOURCE AREA	BRINE VOLUME (M <sup>3</sup> )	AVERAGE LITHIUM GRADE (MG/L)	RESOURCE TYPE	TOTAL LCE (TONNES)
Bashaw District	16.64x10 <sup>9</sup>	74.5	Measured	6,598,000
	23.72x10 <sup>9</sup>	74.5	Indicated	9,404,000
<b>Bashaw TOTAL</b>	<b>40.36x10<sup>9</sup></b>	<b>74.5</b>	<b>M&amp;I</b>	<b>16,002,000</b>
Rocky	3.3x10 <sup>9</sup>	52.9	Inferred	930,000

## High Production Values

- 16.0 Mt LCE of Measured & Indicated and 0.9 Mt LCE of Inferred Mineral Resources<sup>1</sup>
- Represents Canada's largest M&I resource<sup>2</sup> by ~5x
- The Clearwater Area contains 4.3 Mt M&I within the Bashaw District
- Of E3's total permit area, 31% is still to be developed with a resource estimate
- High reservoir deliverability; excellent porosity and permeability enables high production volumes
- 70+ years of production history
- Access to current and historical robust technical data sets
- Significant land position across 600,000 hectares

1: The mineral resource NI 43-101 Technical Report for the North Rocky Property, effective October 27, 2017, identified 0.9Mt LCE (inferred). The mineral resource NI 43-101 Technical Report for the Bashaw District Project, effective March 21, 2023, identified 16.0Mt LCE (measured & indicated). All reports are available on the E3 Lithium's website (e3lithium.ca/technical-reports) and SEDAR (www.sedar.com).

2: According to Natural Resources Canada, Canada currently has an estimated 3.2 million tonnes of M&I lithium resources located in hard rock deposits, making E3's M&I resource Canada's largest: <https://natural-resources.canada.ca/our-natural-resources/minerals-mining/minerals-metals-facts/lithium-facts/24009>

# Strategically Positioned Saskatchewan Assets

## Overview

- Located in the Estevan, Saskatchewan area
- Contiguous land position of 66,800 hectares (~258 sections)
- Duperow formation
- Lithium concentrations in the area as high as 191 mg/L
- Land held since 2021
